

## **IMPORTANT INFORMATION**

- 1. Check your Glitter is free from damage caused by transit, any damage must be reported immediately upon receipt or within 24 hours.**
- 2. Check the full roll thoroughly for any faults. If Glitter is faulty please report within 24 hours, take a photograph and send to [Sales@glitterwallstore.com](mailto:Sales@glitterwallstore.com) describing the fault.**
- 3. Check carefully for any shading difference throughout the roll before hanging, as once applied to the wall we are unable to accept a return or provide a replacement.**
- 4. Lighter colours may pick up on smaller darker particles of glitter during manufacture, this is not accepted as a manufacturing fault and can normally be brushed off.**
- 5. We recommend that Glitter should be hung only by a professional decorator that has experience of hanging a fabric backed wall covering.**
- 6. We will not be responsible for any costs incurred where a decorator has applied faulty Glitter to the wall or not followed our general surface preparation instructions.**
- 7. The method of decorating is overlap and double cut which means that the end product should have seamless joins.**

## **GENERAL SURFACE PREPARATION**

- 1. Remove all existing wallcovering and backing papers, ensure the surface is clean, dry and in sound condition.**
- 2. Please note: Lighter Glitter requires a surface of uniform colour. On a dry absorbent surface apply a good quality emulsion paint to equalise the surface colour using a paint of a similar colour.**
- 3. After painting, we recommend you stain block your wall in preparation for hanging lighter colours to avoid patching or defect.**
- 4. Any mould and algae should be treated with fungicidal wash and used in accordance with the pack instructions and allowed to dry.**
- 5. Any holes, cracks and defects are to be filled flush with good quality filler, used in strict accordance with the manufacturer's instructions. If the wall surface is painted, once dry the filler should be spot primed with a paint of similar colour and composition to match the background.**

## GENERAL HANGING RECOMMENDATIONS

1. Use only recommended Glitter Adhesive, please note that this should not be watered down as this will affect the end result.
2. Ensure good ventilation for hanging and drying.
3. Hang product in roll sequence. Stand back after each drop and assess the results. If hung the wrong way a shading difference will be noticed.
4. Use only full width Glitter. Cutting narrow widths above door frames etc should be avoided. Do not in-fill with off cuts or out of sequence drops.
5. If hanging part width (e.g., into a corner) make sure joint is made using the correct edge. Never join an edge to middle.
6. Apply the adhesive evenly to the wall using a medium pile roller and a brush for cutting in. Allow adhesive to tack off.
7. Do not allow adhesive to get onto the face of your Glitter, removal will be impossible. When cleaning down adjacent areas of adhesive residue, protect the Glitter to prevent contamination.
8. At the top and bottom of each drop allow the Glitter to settle for approximately one hour before trimming. We suggest that 3 lengths are hung at one time. The Glitter has movement therefore this will help before making any cuts.
9. Glitter should be overlapped and spliced immediately, overlap approx. 5cm (2") and trim through the centre. Peel back the leading edge of the wallcovering by at least 5cm (2") until you are ready to hang the next drop.
10. When carrying out an overlap and splice joint make sure to use a new blade for each cut. We suggest, two knives used for each joint, replacing a new blade every joint in both knives
11. Once the drop is in place, make the finishing touches to the joint taking care not to squeeze out adhesive onto the face. The joint may be seam rolled if required. Ensure you do not overwork the joint, as this may cause damage.
12. Glitter should not be washed down or rubbed in any way, in particular at the seams as this will result in a discolouration and shading.
13. Smooth out any air pockets with a plastic comb.
